## Introduction

Nefitra is a company that stands at the intersection of finance and technology. We don't just provide capital for traders; we seek talented individuals and give them the resources to realize their potential in the financial markets.

## Goals and Mission

Our goals are ambitious but simple — we want to make trading in the financial markets accessible and efficient.

Our mission involves finding and supporting exceptional traders, providing them with the necessary financial resources for successful trading.

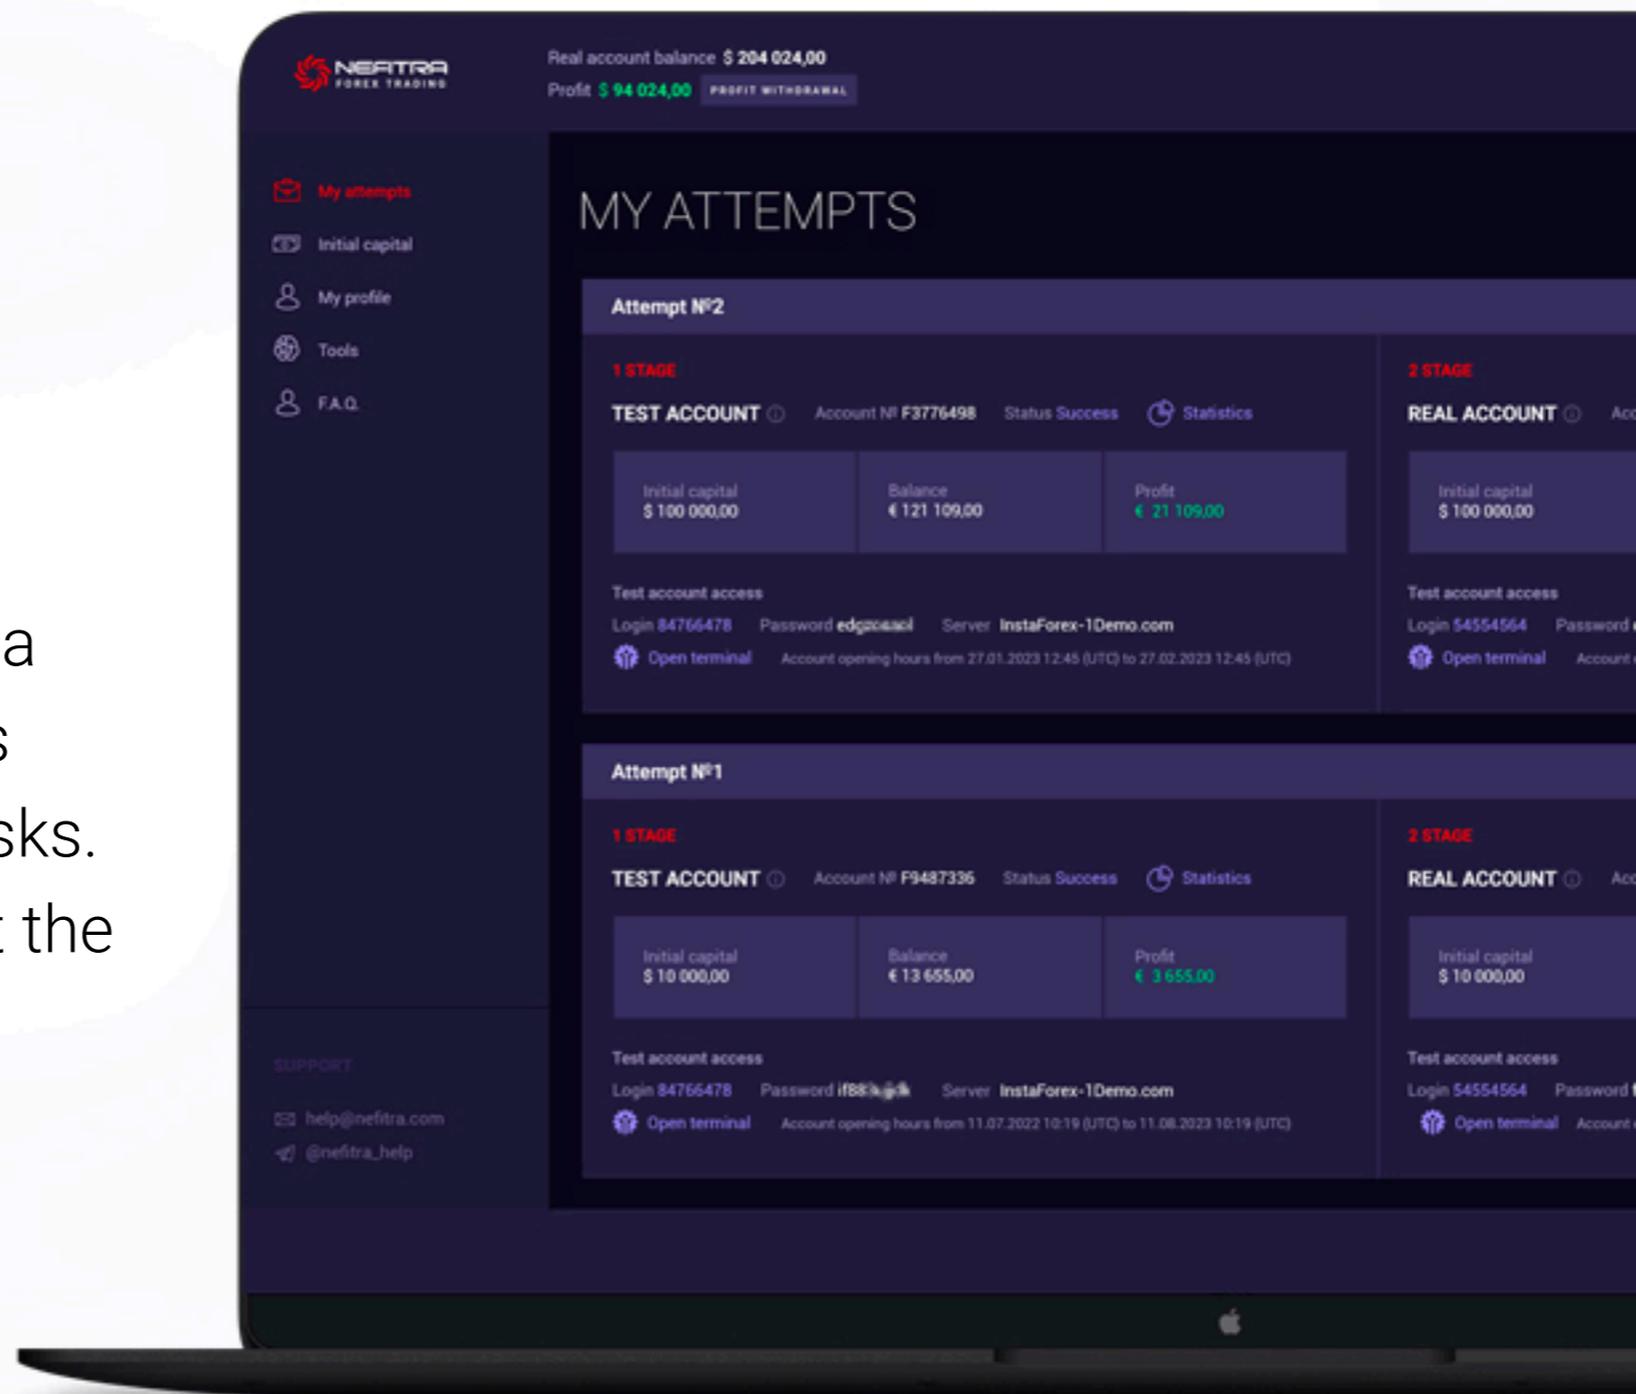

## How the project **works**

Nefitra is a project focused on finding and developing successful traders. To determine whether a trader possesses all the necessary qualities, we have developed a testing phase. This testing is specifically designed to reveal a trader's trading talent. After successfully completing the testing phase, traders are offered collaboration with the Nefitra project, where they can remotely manage the company's accounts.

Traders in Nefitra are entitled to retain 50% of the profits they generate during their collaboration with the project. Nefitra covers all losses, if any occur.

## 01 Selection and testing

First and foremost, we conduct a rigorous selection of candidates through a series of tests and tasks. Only the best of the best will get the chance to work with our capital.

The screenshot displays the NEFITRA trading platform interface. At the top, it shows the real account balance as \$ 204 024,00 and a profit of \$ 94 024,00. The main section is titled "MY ATTEMPTS" and lists two trading attempts. Each attempt is divided into two stages: "1 STAGE" (TEST ACCOUNT) and "2 STAGE" (REAL ACCOUNT). The first attempt (Attempt N°2) shows a test account with an initial capital of \$ 100 000,00, a balance of € 121 109,00, and a profit of € 21 109,00. The second attempt (Attempt N°1) shows a test account with an initial capital of \$ 10 000,00, a balance of € 13 655,00, and a profit of € 3 655,00. Both attempts show successful status and provide access details for the test accounts, including login, password, and server information.

Attempt	Stage	Account Type	Account No.	Status	Initial Capital	Balance	Profit
Attempt N°2	1 STAGE	TEST ACCOUNT	F3776498	Success	\$ 100 000,00	€ 121 109,00	€ 21 109,00
	2 STAGE	REAL ACCOUNT			\$ 100 000,00		
Attempt N°1	1 STAGE	TEST ACCOUNT	F9487336	Success	\$ 10 000,00	€ 13 655,00	€ 3 655,00
	2 STAGE	REAL ACCOUNT			\$ 10 000,00		

## 02 Funding

After successful completion of the selection process, traders are given control of up to \$100,000 of the company's capital.

### Congratulations!

✔ You have successfully passed the test.

# \$100 000

Initial Capital

## Key **advantages** for traders

### **Access to Large Capital**

One of the main problems that the project solves is the lack of capital for trading. By managing a large capital, traders have the opportunity to quickly grow their trading account and generate significantly more profits.

### **Trading Without Losses**

Nefitra also addresses the issue of traders losing their personal savings. Along with this, the problem of the fear of losing personal capital, which negatively impacts trading, is eliminated. Traders will not be held responsible for losses. If something goes wrong, all losses are covered by our company.

## Nefitra plans

### 2025

Launch the project on **all continents**.

### 2026

- Launch an **HR direction** for trader selection.
- **Become the N°1** project for trader financing.

### 2027

Complete the development of **AI for analysis and risk management** for Nefitra traders.

### 2028

Complete the development of **AI for autonomous trading** of the company's capital and the capital of partner funds.

## Conclusion

Nefitra offers a unique opportunity for talented traders. With us, you will receive not just financial support, but also the chance to become part of a team of professionals. We invite you to join our rapidly growing platform and together change the future of financial trading.

## Contact us

We are always open to new ideas and ambitious endeavors!
